We also host a state of the art in house endoscopy suite.

Specializing in the treatment and prevention of gastrointestinal diseases, Board-certified physicians [Dr. Ranvir Singh](#), [Dr. Stephen Rashbaum](#), [Dr. Nitin J. Parikh](#), [Dr. Ruth Montalvo](#), [Dr. Jae Kim](#), or [Dr. Long B. Nguyen](#), offer a full range of services to diagnose, treat, and manage digestive disorders. The in-house endoscopy suite at Digestive Care Physicians is a certified facility that has achieved the highest level of accreditation by the Association for

Ambulatory Health Care (AAAHC). The nursing staff is A.C.L.S. certified and committed to the safety of all patients by providing the highest level of quality care for patients before, during, and after examinations or testing.

The equipment used in the endoscopy suite utilizes state-of-the-art optics and superior visualization systems that allow for a rapid, accurate, and painless examination of the entire digestive tract including high-definition Endoscopes, Digital Imaging, Computer Generated Reports and Flat-Screen Monitors. This allows our physicians to detect, sample and remove abnormal tissues, even small and hard to find flat or slightly raised polyps.

Most diagnostic or therapeutic Gastrointestinal procedures are “minimally invasive” and take, on average, less than an hour to perform. General Anesthesia and a hospital stay are not required; however, mild sedatives and a brief recovery is needed for patient safety and comfort.

Our mission at Digestive Care Physicians is to serve the community with pride, excellence and respect. We strive to provide high quality care which is personalized and cost-effective. We will listen to you attentively, answer all your questions and make you an active partner in your care, in a warm and friendly environment. Our courteous and professional team is always available to assist you and welcomes the opportunity to hear from you. We look forward to a healthy and fruitful relationship.
